

Cryptocurrency Consulting Services – Price Sheet (July 17)

FB Group – Yoda’s Crypto Club - Entry Fee - 1 LTC (through to 31 Dec 17)

Posting of daily charts and news and reviews about the Cryptocurrencies, and latest developments. Indication of price signals and directions for the top coins (Typically, BTC, ETH, XRP, ETC, LTC, DASH, XMR, and others in the Top 10 and sometimes up to the Top 25).

*** Note this is a post only forum with charts and news items and responding to comments and questions **only if time is available**. No guarantees. Purposefully, this is not a Public forum and for serious investors/traders only who wish to stay current with charts, who may not wish to have to necessarily do charts on their own, and who wish to share ideas with others and discuss chart directions and price predictions.

Introduction to Cryptocurrencies - 2 LTC

Designed for the absolute newcomer to the Cryptocurrency Marketplace. 2 Hour phone call or Skype session or chat session through FB Messenger on the options available for purchasing, storing and securing your first BTC/Altcoin purchase. An indication of the best times to buy given the then current market conditions. Discussion of the potential for a long-term buy and hold strategy and a discussion of the potential and pitfalls of choosing to trade coins. Discussion of the pros and cons of Mining versus investing directly into Cryptocurrencies. Intended for the new investor who doesn't know anything yet about the Crypto Space but wishes to gain some direction and get involved.

FB Messenger Chat - Consultation - 2 LTC per hour (Minimum 30 Mins)

Discussion about a members current Coin Portfolio and recommendations for trading and investing. Buy and Hold Strategies and recommendations, current market conditions, mining strategies vs buying and hold vs buying and trading, etc or anything in general about the Crypto Marketplace.

****** Folks these got way out of hand recently and consumed way too much time and time is money regardless how much "FREE" people think should be available on the Internet. Thus, this new price sheet. These prices are specifically intended to cut all idle waste of time chit chat from my day and focus on work, research, trading and providing a service ******

Charting and Technical Analysis - 2 LTC per chart

For any coins which I am not currently following, provide an assessment and review of that coin's future price prospects and buy and sell signals. Please make sure it is a coin where data is available on TradingView. Trading Exchange charts such as those on Bittrex are not detailed enough to provide a complete evaluation, but simply general guidance. Any coin not in the Top 100 will not be considered. Also, I do not chase ICO (Initial Coin Offerings) and recommend that you do not either. Most are simply Pump and Dump scenarios and chasing these will potentially make you a bag-holder for a long time to come.

Training in Charting and Technical Analysis - 4 LTC per hour

Conducted by FB Messenger Chat or Skype. A review of the current charts I am looking at and the signals I am watching for, as reference for how to setup TradingView and do the same with the chart of your choice. Q&A about topics such as:

- Elliot Wave Analysis
- Fibonacci Retracement or Expansion Analysis
- Ichimoku Cloud Analysis (Selecting Entry and Exit Points)
- Long and short-term Trend Channel Analysis
- Moving Average Analysis
- Strategies for moving short term to Fiat or USDT (Tether)
- etc.

Please note: Limit to number of clients at any one time of 5 persons, with the aim of getting up to speed so that it will be possible to begin charting new opportunities on one's own. Method of delivery, one-on-one Google Hangout.

Crypto Currency Charting and Investing eBook - 2 LTC

Work in progress. Availability once completed (anticipated Sept-Oct) via website (to be created) and at Clickbank.com

Combination Package (All of the Above) – 50 LTC

Includes:

- Intro to the Cryptos – 2 hours (many would be familiar with this already)
- Access to FB Group (through to 31 Dec 17. 2018 price TBA)
- Training in Charting and Technical Analysis – Five 1 Hour Sessions (over 8-12 weeks)
- Charting and Technical Analysis of 3 Charts of your choice – 3 hours

- FB Messenger Chat – Five 1 Hour Sessions or the equivalent in shorter sessions (subject to availability and only between 1800hrs and 0400hrs AEST (USA EST Equivalent – 0400hrs – 1400hrs)
- Crypto Currency Charting and Investing eBook – once available, and all further update editions

Notes

Over time much of the above content will be available through discussions in the FB Group alone, but for individuals who wish to progress rapidly the Charting and Technical Analysis Training or Combination Package will assist in accelerating learning.

Some time spent in setting up an account on TradingView (free version recommended) and completing basic familiarization will be of assistance in completing the Charting and Technical Analysis Training (www.tradingview.com).

Prices subject to change (most likely over time, group membership fee to the downside – approx. \$50 in equivalent LTC) and a limited number of clients for training and the combination package that can be accepted at any given time (Max 5).

10% of all LTC received will be directed to the Featherstale Children's Village and the Uchira Childrens Fund (www.sharetanzania.com), and a future planned visit to Tanzania (Sep 2018 Mt. Kilimanjaro Climb?) to work on Photography and a Photo Book to assist John St. Julien in raising awareness for his Community/Work. Thank you for considering joining the group and helping this cause.

Disclaimer: Trading in Cryptocurrencies is inherently risky. Large price swings and fluctuations can occur daily. Please be advised that any trade recommendations made during training, consulting or through the FB Group will be at the user's own risk. Trading involves both risk and hard work. Please do your own due diligence before risking any real money.
